A

AHA Committee Reports

- Specifications for exercise testing equipment, 849A
- Standards for adult exercise testing laboratories, 421A
- Standards for cardiovascular exercise treatment programs, 1084A

AHA Presidential address

- AHA 51st Scientific Sessions, 614A

Akinesis

- Effect of left ventricular akinesis on cardiac performance. Experimental study using a new model, 1019

Amiodarone

- Effects of amiodarone on cardiac and coronary hemodynamics and on myocardial metabolism in patients with coronary artery disease, 1165

Amrinone

- Amrinone: a new non-glycosidic, non-adrenergic cardiotonic agent effective in the treatment of intractable myocardial failure in man, 1098

Amyl nitrite

- Influence of right ventricular hemodynamics on left ventricular diastolic pressure-volume relations in man, 21

Aneurysm

- Cross-sectional echocardiographic diagnosis of coronary artery aneurysms in patients with the mucocutaneous lymph node syndrome, 133
- Echocardiographic evaluation of ventricular septal aneurysms, 920
- Identification and localization of aneurysms of the ascending aorta by cross-sectional echocardiography, 755
- Recurrent sustained ventricular tachycardia. 4. Pleomorphism, 459
- Ventricular aneurysms complicating coxsackievirus group B, types 1 and 4 murine myocarditis, 412

Angina pectoris

- Catecholamines in coronary sinus and peripheral plasma during pacing-induced angina in man, 37
- Clinicopathologic findings in 52 patients studied by technetium-99m stannous pyrophosphate myocardial scintigraphy, 257
- Comparison of cardiovascular responses to static-dynamic effort and dynamic effort alone in patients with chronic ischemic heart disease, 977
- The effects of ergonovine maleate on coronary arterial size, 82
- Factors contributing to altered left ventricular diastolic properties during angina pectoris, 14
- Propranolol in the treatment of angina pectoris. Comparison of duration of action in acute and sustained oral therapy, 571
- Special report: Nomenclature and criteria for diagnosis of ischemic heart disease. Report of the Joint International Society and Federation of Cardiology/World Health Organization Task Force on Standardization of Clinical Nomenclature, 607

Angina, exercise induced

- Myocardial release of lactate, inosine and hypoxanthine during atrial pacing and exercise-induced angina, 43

Angina, variant

- Circadian variation of exercise capacity in patients with Prinzmetal's variant angina: role of exercise-induced coronary arterial spasm, 938
- Coronary arterial spasm as a cause of exercise-induced ST-segment elevation in patients with variant angina, 948
- Coronary artery spasm during exercise in patients with variant angina, 580
- Mechanism of rest and nocturnal angina: observations during continuous hemodynamic and electrocardiographic monitoring, 955

- Nifedipine and Prinzmetal's angina. Letter and response, 195
- Similarities of ergonovine induced and spontaneous attacks of variant angina, 307

- The syndrome of variant angina culminating in acute myocardial infarction, 297

Angina, unstable

- Improvement of myocardial perfusion and left ventricular function after coronary artery bypass grafting in patients with unstable angina, 66

Angiography

- Case report: Skeletal muscle coronary embolism: a complication of coronary angiography, 189
- Editorial: Angiography for study of lipid-lowering therapy, 212
- Effect of filming projection and interobserver variability on angiographic biplane left ventricular volume determination, 96
- Effects of maximal exercise stress on left ventricular function in patients with coronary artery disease using first pass radionuclide angiography. A rapid, noninvasive technique for determining ejection fraction and segmental wall motion, 60
- The pathophysiology and diverse etiology of septal perforator compression, 913
- Pulmonary vein wedge angiography. Letter and response, 194
- Regional ejection fraction: a quantitative radionuclide index of regional left ventricular performance, 1001
- Relationship of cardiothoracic ratio and plain film heart volume to late survival, 89
- Use of combined diet and colestipol in long-term (7—7½ years) treatment of patients with type II hyperlipoproteinemia, 199
- Use of treadmill score to quantify ischemic response and predict extent of coronary disease, 286
- Usefulness and limitations of thallium-201 myocardial scintigraphy in delineating location and size of prior myocardial infarction, 1010

Aorta

- Aberrant coronary artery origin from the aorta. Report of 18 patients, review of literature and delineation of natural history and management, 748
- Anatomy of aortic atresia. Cases presenting with a ventricular septal defect, 173
- Combined aortic valve replacement and myocardial revascularization: results in 220 patients, 75
- Identification and localization of aneurysms of the ascending aorta by cross-sectional echocardiography, 755

Aortic arch

- Dilatation of the ductus arteriosus by prostaglandin E₁ in aortic arch abnormalities, 169

Aortic tract complex

- The conduction system in hypoplasia of the aortic tract complex, 1324

Arrhythmia

- Antiarrhythmic drug therapy in survivors of prehospital cardiac arrest: comparison of effects on chronic ventricular arrhythmias and on recurrent cardiac arrest, 855
- Cardiac arrhythmias in the conscious dog following excision of the sinoatrial node and crista terminalis, 468
- Cellular electrophysiology of human myocardial infarction. 1. Abnormalities of cellular activation, 247
- A computerized method for the rapid display of ventricular activation during the intraoperative study of arrhythmias, 449
- Editorial: Antiarrhythmic therapy, ventricular premature depolarizations and sudden cardiac death: the tip of the iceberg, 864
- Editorial: Disopyramide phosphate (Norpace). A new antiarrhythmic drug, 236
- Electrophysiological effects of disopyramide in patients with bundle branch block, 215

- Electrophysiological effects of disopyramide phosphate on sinus node function in patients with sinus node dysfunction, 226
- Key references: Antiarrhythmic drugs, 1076
- Prevalence of arrhythmias during 24-hour electrocardiographic monitoring and exercise testing in patients with obstructive and nonobstructive hypertrophic cardiomyopathy, 866
- Reaction of the myocardium to cryosurgery: electrophysiology and arrhythmogenic potential, 364
- Special report: Nomenclature and criteria for diagnosis of ischemic heart disease. Report of the Joint International Society and Federation of Cardiology/World Health Organization Task Force on Standardization of Clinical Nomenclature, 607
- Artery, coronary**
- Aberrant coronary artery origin from the aorta. Report of 18 patients, review of literature and delineation of natural history and management, 748
 - Case report: Skeletal muscle coronary embolism: a complication of coronary angiography, 189
 - Effect of beta-adrenergic suppression by propranolol on coronary collateral development in response to chronic coronary ischemia in dogs, 280
 - The effects of ergonovine maleate on coronary arterial size, 82
 - Impaired maximal rate of left ventricular relaxation in patients with coronary artery disease and left ventricular dysfunction, 984
 - Improvement of myocardial perfusion and left ventricular function after coronary artery bypass grafting in patients with unstable angina, 66
 - Left main coronary artery stenosis. Letter and response, 192
- Artery, pulmonary**
- Hemodynamic factors influencing arterial hypoxemia in massive pulmonary embolism with circulatory failure, 909
- Aspirin**
- Aspirin-induced increase in collateral flow after acute coronary occlusion in dogs, 744
- Asymmetric septal hypertrophy**
- Prevalence of arrhythmias during 24-hour electrocardiographic monitoring and exercise testing in patients with obstructive and nonobstructive hypertrophic cardiomyopathy, 866
- Atherosclerosis**
- Editorial: Angiography for study of lipid-lowering therapy, 212
 - Use of combined diet and colestipol in long-term (7-7½ years) treatment of patients with type II hyperlipoproteinemia, 199
- Atresia**
- Anatomy of aortic atresia. Cases presenting with a ventricular septal defect, 173

- A prospective evaluation of intrahisian conduction delay, 1035
- Atropine**
- Cardiac effects of acute ethanol ingestion unmasked by autonomic blockade, 120
 - Effects of atropine on induction and maintenance of atrioventricular nodal reentrant tachycardia, 779
- Autonomic dysfunction**
- Autonomic dysfunction in women with mitral valve prolapse syndrome, 894
 - Cardiac effects of acute ethanol ingestion unmasked by autonomic blockade, 120
- B**
- Balloon pumping**
- Intraaortic balloon pumping. Letter. 846
- Beta-adrenergic suppression**
- Effect of beta-adrenergic suppression by propranolol on coronary collateral development in response to chronic coronary ischemia in dogs, 280
- Blood flow**
- Aspirin-induced increase in collateral flow after acute coronary occlusion in dogs, 744
 - Catecholamines in coronary sinus and peripheral plasma during pacing-induced angina in man, 37
 - Comparison of metabolic and vasoconstrictor stimuli on coronary vascular resistance in man, 544
 - Effect of indomethacin on collateral blood flow and infarct size in the conscious dog, 734
 - Instantaneous blood flow responses to positive end-expiratory pressure with spontaneous ventilation, 1312
 - Instantaneous transmural blood flow and anterior mitral leaflet motion in man, 476
- Blood pressure studies**
- Carotid baroreflex function in young men with borderline blood pressure elevation, 632
 - Effects of volume expansion and contraction in normotensive whites, blacks, and subjects of different ages, 643
- Bundle branch block**
- Electrophysiological effects of disopyramide in patients with bundle branch block, 215
 - Intermittent left bundle branch block: anatomic substrate as reflected in the electrocardiogram during normal conduction, 1040
 - The mechanism of apparent right bundle branch block after transatrial repair of tetralogy of Fallot, 1241
 - Recurrent sustained ventricular tachycardia. 4. Pleomorphism, 459
 - Retrograde conduction in the His-Purkinje system. Analysis of the routes of impulse propagation using His and right bundle branch recordings, 1252
- Bypass surgery**
- Reduction of myocardial infarct size: comparison between left atrial and left ventricular bypass, 275
- C**
- Calcium levels**
- Coronary calcifications in the detection of coronary artery disease and comparison with electrocardiographic exercise testing. Results from the National Heart, Lung, and Blood Institute's Type II Coronary Intervention Study, 1113
 - Reversal of the cardiovascular effects of verapamil by calcium

- and sodium: differences between electrophysiological and hemodynamic responses, 797
- Cardiac arrest**
Antiarrhythmic drug therapy in survivors of prehospital cardiac arrest: comparison of effects on chronic ventricular arrhythmias and on recurrent cardiac arrest, 855
- Cardiac muscle**
Quantitative analysis of cardiac muscle cell disorganization in the ventricular septum in patients with hypertrophic cardiomyopathy, 689
Ultrastructure and transmembrane potentials of cardiac muscle in the human anterior mitral valve leaflet, 1284
- Cardiac muscle cell disorganization**
Quantitative analysis of cardiac muscle cell disorganization in the ventricular septum in patients with hypertrophic cardiomyopathy, 689
- Cardiac tamponade**
Cardiac tamponade. Letter and response, 193
- Cardiomyopathy**
Defective in vitro suppressor cell function in idiopathic congestive cardiomyopathy, 483
Neurogenic skeletal myopathy in patients with primary cardiomyopathy, 492
The pathophysiology and diverse etiology of septal perforator compression, 913
Prevalence and characteristics of disproportionate ventricular septal thickening in infants with congenital heart disease, 126
Prevalence of arrhythmias during 24-hour electrocardiographic monitoring and exercise testing in patients with obstructive and nonobstructive hypertrophic cardiomyopathy, 866
- Cardiotonic agent**
Amrinone: a new non-glycosidic, non-adrenergic cardiotonic agent effective in the treatment of intractable myocardial failure in man, 1098
- Cardiovascular disease**
Diabetes and cardiovascular risk factors: the Framingham Study, 8
Uric acid: a risk factor for coronary heart disease? 969
- Carotid baroreflex function**
Carotid baroreflex function in young men with borderline blood pressure elevation, 632
- Catecholamines**
Cardiac effects of acute ethanol ingestion unmasked by autonomic blockade, 120
Catecholamines in coronary sinus and peripheral plasma during pacing-induced angina in man, 37
Comparative assessment of stimuli that release neuronal and adrenomedullary catecholamines in man, 637
Dopamine beta-hydroxylase and plasma renin activity in patients with low-, normal-, and high-renin essential hypertension, 1063
- Catheterization complication**
Case report: Skeletal muscle coronary embolism: a complication of coronary angiography, 189
- Chest pain**
Use of treadmill score to quantify ischemic response and predict extent of coronary disease, 286
- Children**
Increased coronary mortality in relatives of hypercholesterolemic school children: the Muscatine Study, 320
Pulmonary vascular disease in transposition of the great vessels and intact ventricular septum, 525
Right ventricular outflow tract assessment by cross-sectional echocardiography in tetralogy of Fallot, 395
Subxiphoid cross-sectional echocardiography in infants and children with congenital heart disease, 513
- Chlorthalidone**
Dopamine beta-hydroxylase and plasma renin activity in patients with low-, normal-, and high-renin essential hypertension, 1063
- Cholesterol**
Diabetes and cardiovascular risk factors: the Framingham Study, 8
Increased coronary mortality in relatives of hypercholesterolemic school children: the Muscatine Study, 320
International lecture: Effect of cholesterol-lowering diet on mortality from coronary heart disease and other causes, 1
Use of combined diet and colestipol in long-term (7-7½ years) treatment of patients with type II hyperlipoproteinemia, 199
- Circulation**
Suggested changes in journal editorial policy. Letter and response, 841
- CK serum**
Detection of myocardial infarction extension by CK-B radioimmunoassay, 268
Enzymatic indices of myocardial necrosis: influence of short- and long-term prognosis after myocardial infarction, 113
Lysosomal and cytosolic enzyme release in acute myocardial infarction: effects of methylprednisolone, 730
- Colestipol**
Use of combined diet and colestipol in long-term (7-7½ years) treatment of patients with type II hyperlipoproteinemia, 199
- Commissurotomy**
Long-term changes in mitral valve area after successful mitral commissurotomy, 443
- Computerized electrode mapping**
A computerized method for the rapid display of ventricular activation during the intraoperative study of arrhythmias, 449
- Conduction**
The cardiac conduction system in situs ambiguus, 879
Case report: Congenital abnormalities of the conduction system in two patients with tachyarrhythmias, 593
Electrophysiologic assessment of the atrioventricular conduction system after surgical correction of ventricular preexcitation, 789
Intermittent left bundle branch block: anatomic substrate as reflected in the electrocardiogram during normal conduction, 1040

Cross-sectional echocardiographic diagnosis of coronary artery aneurysms in patients with the mucocutaneous lymph node syndrome, 133

Coronary arteriography

Complications of coronary arteriography in the collaborative study of coronary artery surgery (CASS), 1105

Coronary artery disease

Comparison of metabolic and vasoconstrictor stimuli on coronary vascular resistance in man, 544

Coronary calcifications in the detection of coronary artery disease and comparison with electrocardiographic exercise testing. Results from the National Heart, Lung, and Blood Institute's Type II Coronary Intervention Study, 1113

The effect of delay in propranolol administration on reduction of myocardial infarct size after experimental coronary artery occlusion in dogs, 1148

Effects of amiodarone on cardiac and coronary hemodynamics and on myocardial metabolism in patients with coronary artery disease, 1165

Effects of maximal exercise stress on left ventricular function in patients with coronary artery disease using first pass radionuclide angiography. A rapid, noninvasive technique for determining ejection fraction and segmental wall motion, 60

Effects of the Valsalva maneuver on myocardial ischemia in patients with coronary artery disease, 1304

Effects of verapamil on myocardial performance in coronary disease, 313

Evidence from a nonrandomized study that coronary surgery prolongs survival in patients with two-vessel coronary disease, 430

Exercise echocardiography: detection of wall motion abnormalities during ischemia, 50

Factors contributing to altered left ventricular diastolic properties during angina pectoris, 14

Impaired maximal rate of left ventricular relaxation in patients with coronary artery disease and left ventricular dysfunction, 984

Mechanism of rest and nocturnal angina: observations during continuous hemodynamic and electrocardiographic monitoring, 955

QRS changes in coronary artery disease. Letter and response, 841

Thallium-201 myocardial scintigraphy in patients with triple-vessel disease and ischemic exercise stress tests, 714

Transient defects of resting thallium scans in patients with coronary artery disease, 707

Use of treadmill score to quantify ischemic response and predict extent of coronary disease, 286

Coronary artery surgery

Complications of coronary arteriography in the collaborative study of coronary artery surgery (CASS), 1105

Coronary calcification

Coronary calcifications in the detection of coronary artery disease and comparison with electrocardiographic exercise testing. Results from the National Heart, Lung, and Blood Institute's Type II Coronary Intervention Study, 1113

Coronary collateral circulation

Aspirin-induced increase in collateral flow after acute coronary occlusion in dogs, 744

Effect of beta-adrenergic suppression by propranolol on coronary collateral development in response to chronic coronary ischemia in dogs, 280

Effect of indomethacin on collateral blood flow and infarct size in the conscious dog, 734

The role of collateral circulation in the various coronary syndromes, 1137

Coronary heart disease

Coronary artery spasm during exercise in patients with variant angina, 580

International lecture: Effect of cholesterol-lowering diet on mortality from coronary heart disease and other causes, 1

Uric acid: a risk factor for coronary heart disease? 969

Variables predictive of survival in patients with coronary disease. Selection by univariate and multivariate analyses from the clinical, electrocardiographic, exercise, arteriographic, and quantitative angiographic evaluations, 421

Coronary intervention study

Coronary calcifications in the detection of coronary artery disease and comparison with electrocardiographic exercise

testing. Results from the National Heart, Lung, and Blood Institute's Type II Coronary Intervention Study, 1113

Coronary sinus

Catecholamines in coronary sinus and peripheral plasma during pacing-induced angina in man, 37

Coronary vascular resistance

Comparison of metabolic and vasoconstrictor stimuli on coronary vascular resistance in man, 544

Coxsackievirus

Ventricular aneurysms complicating coxsackievirus group B, types 1 and 4 murine myocarditis, 412

Crista terminalis

Cardiac arrhythmias in the conscious dog following excision of the sinoatrial node and crista terminalis, 468

The cardiac conduction system in situs ambiguus, 879

Cryosurgery

Reaction of the myocardium to cryosurgery: electrophysiology and arrhythmogenic potential, 364

D**Diabetes**

Diabetes and cardiovascular risk factors: the Framingham Study, 8

Diastolic pressure measurements

Editorial: Acute displacement of the diastolic pressure-volume curve of the left ventricle: role of the pericardium and the right ventricle, 32

Factors contributing to altered left ventricular diastolic properties during angina pectoris, 14

Influence of right ventricular hemodynamics on left ventricular diastolic pressure-volume relations in man, 21

Diet

International lecture: Effect of cholesterol-lowering diet on mortality from coronary heart disease and other causes, 1

Use of combined diet and colestipol in long-term (7-7½ years) treatment of patients with type II hyperlipoproteinemia, 199

Digitalis

Key references: Digitalis, 837

Diltiazem

Circadian variation of exercise capacity in patients with Prinzmetal's variant angina: role of exercise-induced coronary arterial spasm, 938

Discrete subaortic stenosis

Echocardiography in discrete subaortic stenosis, 506

Disopyramide

Editorial: Disopyramide phosphate (Norpace). A new antiarrhythmic drug, 236

Electrophysiological effects of disopyramide in patients with bundle branch block, 215

Electrophysiological effects of disopyramide phosphate on sinus node function in patients with sinus node dysfunction, 226

Diuretics

Uric acid: a risk factor for coronary heart disease? 969

Dog studies

Aspirin-induced increase in collateral flow after acute coronary occlusion in dogs, 744

Cardiac arrhythmias in the conscious dog following excision of the sinoatrial node and crista terminalis, 468

Effect of beta-adrenergic suppression by propranolol on coronary collateral development in response to chronic coronary ischemia in dogs, 280

Effect of indomethacin on collateral blood flow and infarct size in the conscious dog, 734

Effect of left ventricular akinesis on cardiac performance. Experimental study using a new model, 1019

Effects of nitroglycerin on echocardiographic measurements of left ventricular wall thickness and regional myocardial performance during acute coronary ischemia, 926

Reaction of the myocardium to cryosurgery: electrophysiology and arrhythmogenic potential, 364

Reduction of myocardial infarct size: comparison between left atrial and left ventricular bypass, 275

Reversal of the cardiovascular effects of verapamil by calcium

and sodium: differences between electrophysiological and hemodynamic responses, 797

Dopamine

Catecholamines in coronary sinus and peripheral plasma during pacing-induced angina in man, 37

Comparative assessment of stimuli that release neuronal and adrenomedullary catecholamines in man, 637

Dopamine beta-hydroxylase and plasma renin activity in patients with low-, normal-, and high-renin essential hypertension, 1063

Doppler technique

An ultrasound Doppler technique for the noninvasive determination of the pressure gradient in the Björk-Shiley mitral valve, 436

Drug therapy

Antiarrhythmic drug therapy in survivors of prehospital cardiac arrest: comparison of effects on chronic ventricular arrhythmias and on recurrent cardiac arrest, 855

Effects of verapamil on myocardial performance in coronary disease, 313

Key references: Antiarrhythmic drugs, 1076

Reversal of the cardiovascular effects of verapamil by calcium and sodium: differences between electrophysiological and hemodynamic responses, 797

The role of left ventricular conduction in the electrogenesis of left ventricular hypertrophy. An electrophysiologic study in man, 1044

Embolism

Case report: Skeletal muscle coronary embolism: a complication of coronary angiography, 189

Hemodynamic factors influencing arterial hypoxemia in massive pulmonary embolism with circulatory failure, 909

End-systolic pressure-volume ratio

End-systolic pressure-volume relations. Letter, 419

Endocarditis, infective

A collaborative study of infective endocarditis in the 1970s. Emphasis on infections in patients who have undergone cardiovascular surgery, 327

Imaging experimental infective endocarditis with indium-111-labeled blood cellular components, 336

Isolated gonococcal pulmonary valve endocarditis: diagnosis by echocardiography, 1319

Endomyocardial fibrosis

Sudden early diastolic anterior movement of the septum in endomyocardial fibrosis. Letter, 847

Enzyme levels

Enzymatic indices of myocardial necrosis: influence of short- and long-term prognosis after myocardial infarction, 113

Lysosomal and cytosolic enzyme release in acute myocardial infarction: effects of methylprednisolone, 730

Propranolol and enzyme levels. Letter and response, 192

Epicardial activation

A computerized method for the rapid display of ventricular activation during the intraoperative study of arrhythmias, 449

Epicardial activation of the intact human heart without conduction defects, 161

Epinephrine

Catecholamines in coronary sinus and peripheral plasma during pacing-induced angina in man, 37

Comparative assessment of stimuli that release neuronal and adrenomedullary catecholamines in man, 637

Ergonovine, maleate

Coronary arterial spasm as a cause of exercise-induced ST-segment elevation in patients with variant angina, 948

The effects of ergonovine maleate on coronary arterial size, 82

Similarities of ergonovine induced and spontaneous attacks of variant angina, 307

Ethanol

Cardiac effects of acute ethanol ingestion unmasked by autonomic blockade, 120

Exercise testing

Cardiovascular response to isometric exercise in normal adolescents, 651

Circadian variation of exercise capacity in patients with Prinzmetal's variant angina: role of exercise-induced coronary arterial spasm, 938

Comparison of cardiovascular responses to static-dynamic effort and dynamic effort alone in patients with chronic ischemic heart disease, 977

Coronary arterial spasm as a cause of exercise-induced ST-segment elevation in patients with variant angina, 948

Coronary artery spasm during exercise in patients with variant angina, 580

Coronary calcifications in the detection of coronary artery disease and comparison with electrocardiographic exercise testing. Results from the National Heart, Lung, and Blood Institute's Type II Coronary Intervention Study, 1113

Echocardiographic evaluation of left ventricular size and performance during handgrip and supine and upright bicycle exercise, 1188

Effects of maximal exercise stress on left ventricular function in patients with coronary artery disease using first pass radio-nuclide angiography. A rapid, noninvasive technique for determining ejection fraction and segmental wall motion, 60

Evidence of Frank-Starling effect in man during severe semi-supine exercise, 655

Exercise echocardiography: detection of wall motion abnormalities during ischemia, 50

Immediate effects of hydralazine-isosorbide dinitrate combination on exercise capacity and exercise hemodynamics in patients with left ventricular failure, 1085

The importance of clinical subsets in interpreting maximal treadmill exercise test results: the role of multiple-lead ECG systems, 560

Myocardial release of lactate, inosine and hypoxanthine during atrial pacing and exercise-induced angina, 43

Prevalence of arrhythmias during 24-hour electrocardiographic monitoring and exercise testing in patients with obstructive and nonobstructive hypertrophic cardiomyopathy, 866

Specifications for exercise testing equipment, 849A

standards for adult exercise testing laboratories, 421A

Standards for cardiovascular exercise treatment programs, 1084A

Thallium-201 myocardial scintigraphy in patients with triple-vessel disease and ischemic exercise stress tests, 714

Use of treadmill score to quantify ischemic response and predict extent of coronary disease, 286

Experimental studies

Effect of beta-adrenergic suppression by propranolol on coronary collateral development in response to chronic coronary ischemia in dogs, 280

Effect of left ventricular akinesis on cardiac performance. Experimental study using a new model, 1019

Imaging experimental infective endocarditis with indium-111-labeled blood cellular components, 336

Morphological development of the pulmonary vascular bed in experimental pulmonic stenosis, 179

Expiratory pressure

Instantaneous blood flow responses to positive end-expiratory pressure with spontaneous ventilation, 1312

F**Finnish Mental Hospital Study**

International lecture: Effect of cholesterol-lowering diet on mortality from coronary heart disease and other causes, 1

First heart sound

The quality of resonance of the first heart sound after myocardial infarction: clinical significance, 1144

Fistula, arteriovenous

Congenital coronary arteriovenous fistula. Report of 13 patients, review of the literature and delineation of management, 849

Framingham Study

Diabetes and cardiovascular risk factors: the Framingham Study, 8

Frank-Starling effect

Evidence of Frank-Starling effect in man during severe semi-supine exercise, 655

G**Gas-liquid chromatography**

Blood levels after sublingual nitroglycerin, 585

Quantitative determination of trinitroglycerin in human plasma, 588

Graft

Improvement of myocardial perfusion and left ventricular function after coronary artery bypass grafting in patients with unstable angina, 66

H**Heart block**

Diastolic murmur of complete heart block. Letter and response, 844

Incidence and site of atrioventricular block in patients with chronic bifascicular block, 238

Heart failure

Amrinone: a new non-glycosidic, non-adrenergic cardiotonic agent effective in the treatment of intractable myocardial failure in man, 1098

Editorial: How much can we expect from vasodilator therapy in congestive heart failure? 1092

Effect of prazosin vs placebo on chronic left ventricular heart failure, 344

Heart murmur

Heart murmurs in cardiac sarcoidosis. Letter, 1079

Heart position

Editorial: Positional variations of the heart and its component chambers, 886

Heart volume

Relationship of cardiothoracic ratio and plain film heart volume to late survival, 89

Hemodynamic evaluation

Comparison of metabolic and vasoconstrictor stimuli on coronary vascular resistance in man, 544

Effects of amiodarone on cardiac and coronary hemodynamics and on myocardial metabolism in patients with coronary artery disease, 1165

Hemodynamic and clinical tachyphylaxis to prazosin-mediated afterload reduction in severe chronic congestive heart failure, 531

Hemodynamic factors influencing arterial hypoxemia in massive pulmonary embolism with circulatory failure, 909

Influence of right ventricular hemodynamics on left ventricular diastolic pressure-volume relations in man, 21

Mechanism of rest and nocturnal angina: observations during continuous hemodynamic and electrocardiographic monitoring, 955

Reversal of the cardiovascular effects of verapamil by calcium and sodium: differences between electrophysiological and hemodynamic responses, 797

His bundle recording

Incidence and site of atrioventricular block in patients with chronic bifascicular block, 238

Intraoperative recording of specialized atrioventricular conduction tissue electrograms in 47 patients, 150

A prospective evaluation of intrahisian conduction delay, 1035

His-Purkinje system

Retrograde conduction in the His-Purkinje system. Analysis of the routes of impulse propagation using His and right bundle branch recordings, 1252

Hydralazine

Hemodynamic and clinical tachyphylaxis to prazosin-mediated afterload reduction in severe chronic congestive heart failure, 531

Immediate effects of hydralazine-isosorbide dinitrate combination on exercise capacity and exercise hemodynamics in patients with left ventricular failure, 1085

Hyperlipoproteinemia

Use of combined diet and colestipol in long-term (7—7½ years) treatment of patients with type II hyperlipoproteinemia, 199

Hypertension

Carotid baroreflex function in young men with borderline blood pressure elevation, 632

Dopamine beta-hydroxylase and plasma renin activity in patients with low-, normal-, and high-renin essential hypertension, 1063

Echocardiographic assessment of cardiac anatomy and function in hypertensive subjects, 623

Effects of volume expansion and contraction in normotensive whites, blacks, and subjects of different ages, 643

Improving compliance with therapeutic regimens in hypertensive patients in a community health center, 540

Treatment of hypertension with nifedipine, a calcium antagonist agent, 1056

Hypertrophy

Determinants of ventricular function in pressure-overload hypertrophy in man, 679

Diagnostic value of visualization of the right ventricle using thallium-201 myocardial imaging, 182

Idiopathic hypertrophic subaortic stenosis viewed by wide-angle, phased-array echocardiography, 1206

A mathematical model of the dynamic geometry of the intact left ventricle and its application to clinical data, 1024

The pathophysiology and diverse etiology of septal perforator compression, 913

Quantitative analysis of cardiac muscle cell disorganization in the ventricular septum in patients with hypertrophic cardiomyopathy, 689

The role of left ventricular conduction in the electrogenesis of left ventricular hypertrophy. An electrophysiologic study in man, 1044

Hypoplasia

The conduction system in hypoplasia of the aortic tract complex, 1324

Echocardiographic estimation of ventricular hypoplasia in complete atrioventricular canal, 888

Hypothermia, intraoperative

Combined aortic valve replacement and myocardial revascularization: results in 220 patients, 75

Hypoxanthine

Myocardial release of lactate, inosine and hypoxanthine during atrial pacing and exercise-induced angina, 43

Hypoxemia

Hemodynamic factors influencing arterial hypoxemia in massive pulmonary embolism with circulatory failure, 909

I**Idiopathic congestive cardiomyopathy**

Defective in vitro suppressor cell function in idiopathic congestive cardiomyopathy, 483

Neurogenic skeletal myopathy in patients with primary cardiomyopathy, 492

Idiopathic hypertrophic subaortic stenosis

Idiopathic hypertrophic subaortic stenosis viewed by wide-angle, phased-array echocardiography, 1206

The pathophysiology and diverse etiology of septal perforator compression, 913

Impulse propagation

Retrograde conduction in the His-Purkinje system. Analysis of the routes of impulse propagation using His and right bundle branch recordings, 1252

Indomethacin

Effect of indomethacin on collateral blood flow and infarct size in the conscious dog, 734

Infants

Dilatation of the ductus arteriosus by prostaglandin E₁ in aortic arch abnormalities, 169

Effect of verapamil in infants with paroxysmal supraventricular tachycardia, 876

Prevalence and characteristics of disproportionate ventricular septal thickening in infants with congenital heart disease, 126

Subxiphoid cross-sectional echocardiography in infants and children with congenital heart disease, 513

Ventricular septal defect in infancy: a combined vectorcardiographic and echocardiographic study, 385

Infarct size

Effect of indomethacin on collateral blood flow and infarct size in the conscious dog, 734

Reduction of myocardial infarct size: comparison between left atrial and left ventricular bypass, 275

Inosine

Myocardial release of lactate, inosine and hypoxanthine during atrial pacing and exercise-induced angina, 43

Interventricular septum

Interventricular septum in chronic constrictive pericarditis. Letter and response, 846

Intrahisian conduction delay

A prospective evaluation of intrahisian conduction delay, 1035

Ischemia

Comparison of cardiovascular responses to static-dynamic effort and dynamic effort alone in patients with chronic ischemic heart disease, 977

Comparison of metabolic and vasoconstrictor stimuli on coronary vascular resistance in man, 544

Editorial: Acute displacement of the diastolic pressure-volume curve of the left ventricle: role of the pericardium and the right ventricle, 32

Effect of beta-adrenergic suppression by propranolol on coronary collateral development in response to chronic coronary ischemia in dogs, 280

Effects of nitroglycerin on echocardiographic measurements of left ventricular wall thickness and regional myocardial performance during acute coronary ischemia, 926

Effects of open heart surgery on end-diastolic pressure-diameter relations of the human left ventricle, 662

Exercise echocardiography: detection of wall motion abnormalities during ischemia, 50

- Body surface low-level potentials during ventricular repolarization with analysis of the ST segment. Variability in normal subjects, 822
- Circadian variation of exercise capacity in patients with Prinzmetal's variant angina: role of exercise-induced coronary arterial spasm, 938
- Comparison of cardiovascular responses to static-dynamic effort and dynamic effort alone in patients with chronic ischemic heart disease, 977
- Coronary arterial spasm as a cause of exercise-induced ST-segment elevation in patients with variant angina, 948
- Coronary artery spasm during exercise in patients with variant angina, 580
- Isopotential body surface mapping in subjects of all ages: emphasis on low-level potentials with analysis of the method, 805
- Spontaneous course of ST-segment elevation in acute anterior myocardial infarction, 105
- The syndrome of variant angina culminating in acute myocardial infarction, 297
- Use of treadmill score to quantify ischemic response and predict extent of coronary disease, 286

Stellate ganglia

- Preeminence of the left stellate ganglion in the long Q-T syndrome, 769

Stenosis, aortic

- Body surface potential maps in patients with pulmonic valvular and aortic valvular stenosis of mild to moderate severity, 1277
- Echocardiography in discrete subaortic stenosis, 506
- A mathematical model of the dynamic geometry of the intact left ventricle and its application to clinical data, 1024

Stenosis, coronary artery

- Left main coronary artery stenosis. Letter and response, 192

Stenosis, pulmonary

- Anatomy of aortic atresia. Cases presenting with a ventricular septal defect, 173
- Body surface potential maps in patients with pulmonic valvular and aortic valvular stenosis of mild to moderate severity, 1277

Stenosis, subaortic

- Idiopathic hypertrophic subaortic stenosis viewed by wide-angle, phased-array echocardiography, 1206
- The pathophysiology and diverse etiology of septal perforator compression, 913

Stroke volume

- Mitral valve stroke volume. Letter, 1081

Sudden death

- Aberrant coronary artery origin from the aorta. Report of 18 patients, review of literature and delineation of natural history and management, 748
- Editorial: Antiarrhythmic therapy, ventricular premature depolarizations and sudden cardiac death: the tip of the iceberg, 864

- Preeminence of the left stellate ganglion in the long Q-T syndrome, 769
- Prolonged QT interval to predict sudden death. Letter and response, 1079

Suppressor cell function

- Defective in vitro suppressor cell function in idiopathic congestive cardiomyopathy, 483

Survival rate

- Evidence from a nonrandomized study that coronary surgery prolongs survival in patients with two-vessel coronary disease, 430
- Relationship of cardiothoracic ratio and plain film heart volume to late survival, 89
- Variables predictive of survival in patients with coronary disease. Selection by univariate and multivariate analyses from the clinical, electrocardiographic, exercise, arteriographic, and quantitative angiographic evaluations, 421

T

Tachycardia

- Case report: Congenital abnormalities of the conduction system in two patients with tachyarrhythmias, 593
- Effect of verapamil in infants with paroxysmal supraventricular tachycardia, 876
- Effects of atropine on induction and maintenance of atrioventricular nodal reentrant tachycardia, 779
- Epicardial activation of the intact human heart without conduction defects, 161
- Prevalence of arrhythmias during 24-hour electrocardiographic monitoring and exercise testing in patients with obstructive and nonobstructive hypertrophic cardiomyopathy, 866
- Recurrent sustained ventricular tachycardia. 4. Pleomorphism, 459

Tachyphylaxis

- Hemodynamic and clinical tachyphylaxis to prazosin-mediated afterload reduction in severe chronic congestive heart failure, 531

Technetium-99m stannous pyrophosphate

- Clinical implications of the technetium-99m stannous pyrophosphate myocardial scintigraphic "doughnut" pattern in patients with acute myocardial infarcts, 721
- Clinicopathologic findings in 52 patients studied by technetium-99m stannous pyrophosphate myocardial scintigraphy, 257

Tetralogy of Fallot

- Intraoperative recording of specialized atrioventricular conduction tissue electrograms in 47 patients, 150
- The mechanism of apparent right bundle branch block after transatrial repair of tetralogy of Fallot, 1241
- Right ventricular outflow tract assessment by cross-sectional echocardiography in tetralogy of Fallot, 395
- Status of the adult and adolescent after repair of tetralogy of Fallot, 1232

Thallium-201

- Diagnostic value of visualization of the right ventricle using thallium-201 myocardial imaging, 182
- Thallium-201 myocardial scintigraphy in patients with triple-vessel disease and ischemic exercise stress tests, 714
- Transient defects of resting thallium scans in patients with coronary artery disease, 707
- Usefulness and limitations of thallium-201 myocardial scintigraphy in delineating location and size of prior myocardial infarction, 1010

Thrombosis

- Deep venous thrombosis of the upper extremity: a reappraisal, 350

Transplantation, cardiac

- The effects of ergonovine maleate on coronary arterial size, 82

Transposition of the great arteries

- Intraoperative recording of specialized atrioventricular conduction tissue electrograms in 47 patients, 150
- Pulmonary vascular disease in transposition of the great vessels and intact ventricular septum, 525

Tricuspid atresia

- Intraoperative recording of specialized atrioventricular conduction tissue electrograms in 47 patients, 150

Tumor

- Case report: Right atrial myxoma: unusual clinical presentation and typical glandular histology, 1070

Type II coronary intervention study

- Coronary calcifications in the detection of coronary artery disease and comparison with electrocardiographic exercise testing. Results from the National Heart, Lung, and Blood Institute's Type II Coronary Intervention Study, 1113

U

U wave

- Body surface low-level potentials during ventricular repolarization with analysis of the ST segment. Variability in normal subjects, 822
- Isopotential body surface mapping in subjects of all ages: emphasis on low-level potentials with analysis of the method, 805

Univentricular heart

- Univentricular heart of right ventricular type with double or common inlet, 403

Uric acid

- Uric acid: a risk factor for coronary heart disease? 969

V

Valsalva maneuver

- Effects of the Valsalva maneuver on myocardial ischemia in patients with coronary artery disease, 1304

Valve replacement

- A collaborative study of infective endocarditis in the 1970s. Emphasis on infections in patients who have undergone cardiovascular surgery, 327

- An ultrasound Doppler technique for the noninvasive determination of the pressure gradient in the Björk-Shiley mitral valve, 436

- Valve prosthesis-patient mismatch. Letter and response, 418

Valve, aortic

- Combined aortic valve replacement and myocardial revascularization: results in 220 patients, 75

Valve, mitral

- Autonomic dysfunction in women with mitral valve prolapse syndrome, 894

- Current topic: The mechanism of closure of the mitral valve: a continuing controversy, 615

- Familial occurrence of mitral valve prolapse in X-linked muscular dystrophy, 1299

- Long-term changes in mitral valve area after successful mitral commissurotomy, 443

- Mitral valve closure in atrial flutter, 902

- Mitral valve stroke volume. Letter and response, 1081

- Prevalence of mitral valve prolapse in presumably healthy young men, 619

- Temporal response to left ventricular performance to mitral valve surgery, 1218

- An ultrasound Doppler technique for the noninvasive determination of the pressure gradient in the Björk-Shiley mitral valve, 436

Valve, pulmonary

- Isolated gonococcal pulmonary valve endocarditis: diagnosis by echocardiography, 1319

Vasodilation

- Editorial: How much can we expect from vasodilator therapy in congestive heart failure? 1092

Ventricular ectopic frequency

- Ventricular premature contractions: a randomized non-drug intervention trial in normal men, 762

Ventricular ectopic frequency

Long-term ECG monitoring to assess ventricular ectopic activity. Letter and response, 843

Ventricular premature depolarizations

Editorial: Antiarrhythmic therapy, ventricular premature depolarizations and sudden cardiac death: the tip of the iceberg, 864

Prevalence of arrhythmias during 24-hour electrocardiographic monitoring and exercise testing in patients with obstructive and nonobstructive hypertrophic cardiomyopathy, 866

Ventricular premature contractions: a randomized non-drug intervention trial in normal men, 762

Ventricular repolarization

Body surface low-level potentials during ventricular repolarization with analysis of the ST segment. Variability in normal subjects, 822

Ventricular septal defect

Anatomy of aortic atresia. Cases presenting with a ventricular septal defect, 173

Echocardiographic evaluation of ventricular septal aneurysms, 920

Intraoperative recording of specialized atrioventricular conduction tissue electrograms in 47 patients, 150

Ventricular septal defect in infancy: a combined vectorcardiographic and echocardiographic study, 385

Verapamil

Cellular electrophysiology of human myocardial infarction. I. Abnormalities of cellular activation, 247

Effect of verapamil in infants with paroxysmal supraventricular tachycardia, 876

Effects of verapamil on myocardial performance in coronary disease, 313

Reversal of the cardiovascular effects of verapamil by calcium and sodium: differences between electrophysiological and hemodynamic responses, 797

Volume overload

Determinants of ventricular function in pressure-overload hypertrophy in man, 679

W**Wall dynamics**

The characteristic sequence for the onset of contraction in the normal human left ventricle, 671

Effects of maximal exercise stress on left ventricular function in patients with coronary artery disease using first pass radionuclide angiocardiology. A rapid, noninvasive technique for determining ejection fraction and segmental wall motion, 60

Exercise echocardiography: detection of wall motion abnormalities during ischemia, 50

Improvement of myocardial perfusion and left ventricular function after coronary artery bypass grafting in patients with unstable angina, 66

Quantitative left ventricular wall motion analysis: a comparison of area, chord and radial methods, 991

Regional ejection fraction: a quantitative radionuclide index of regional left ventricular performance, 1001

Wall thickness

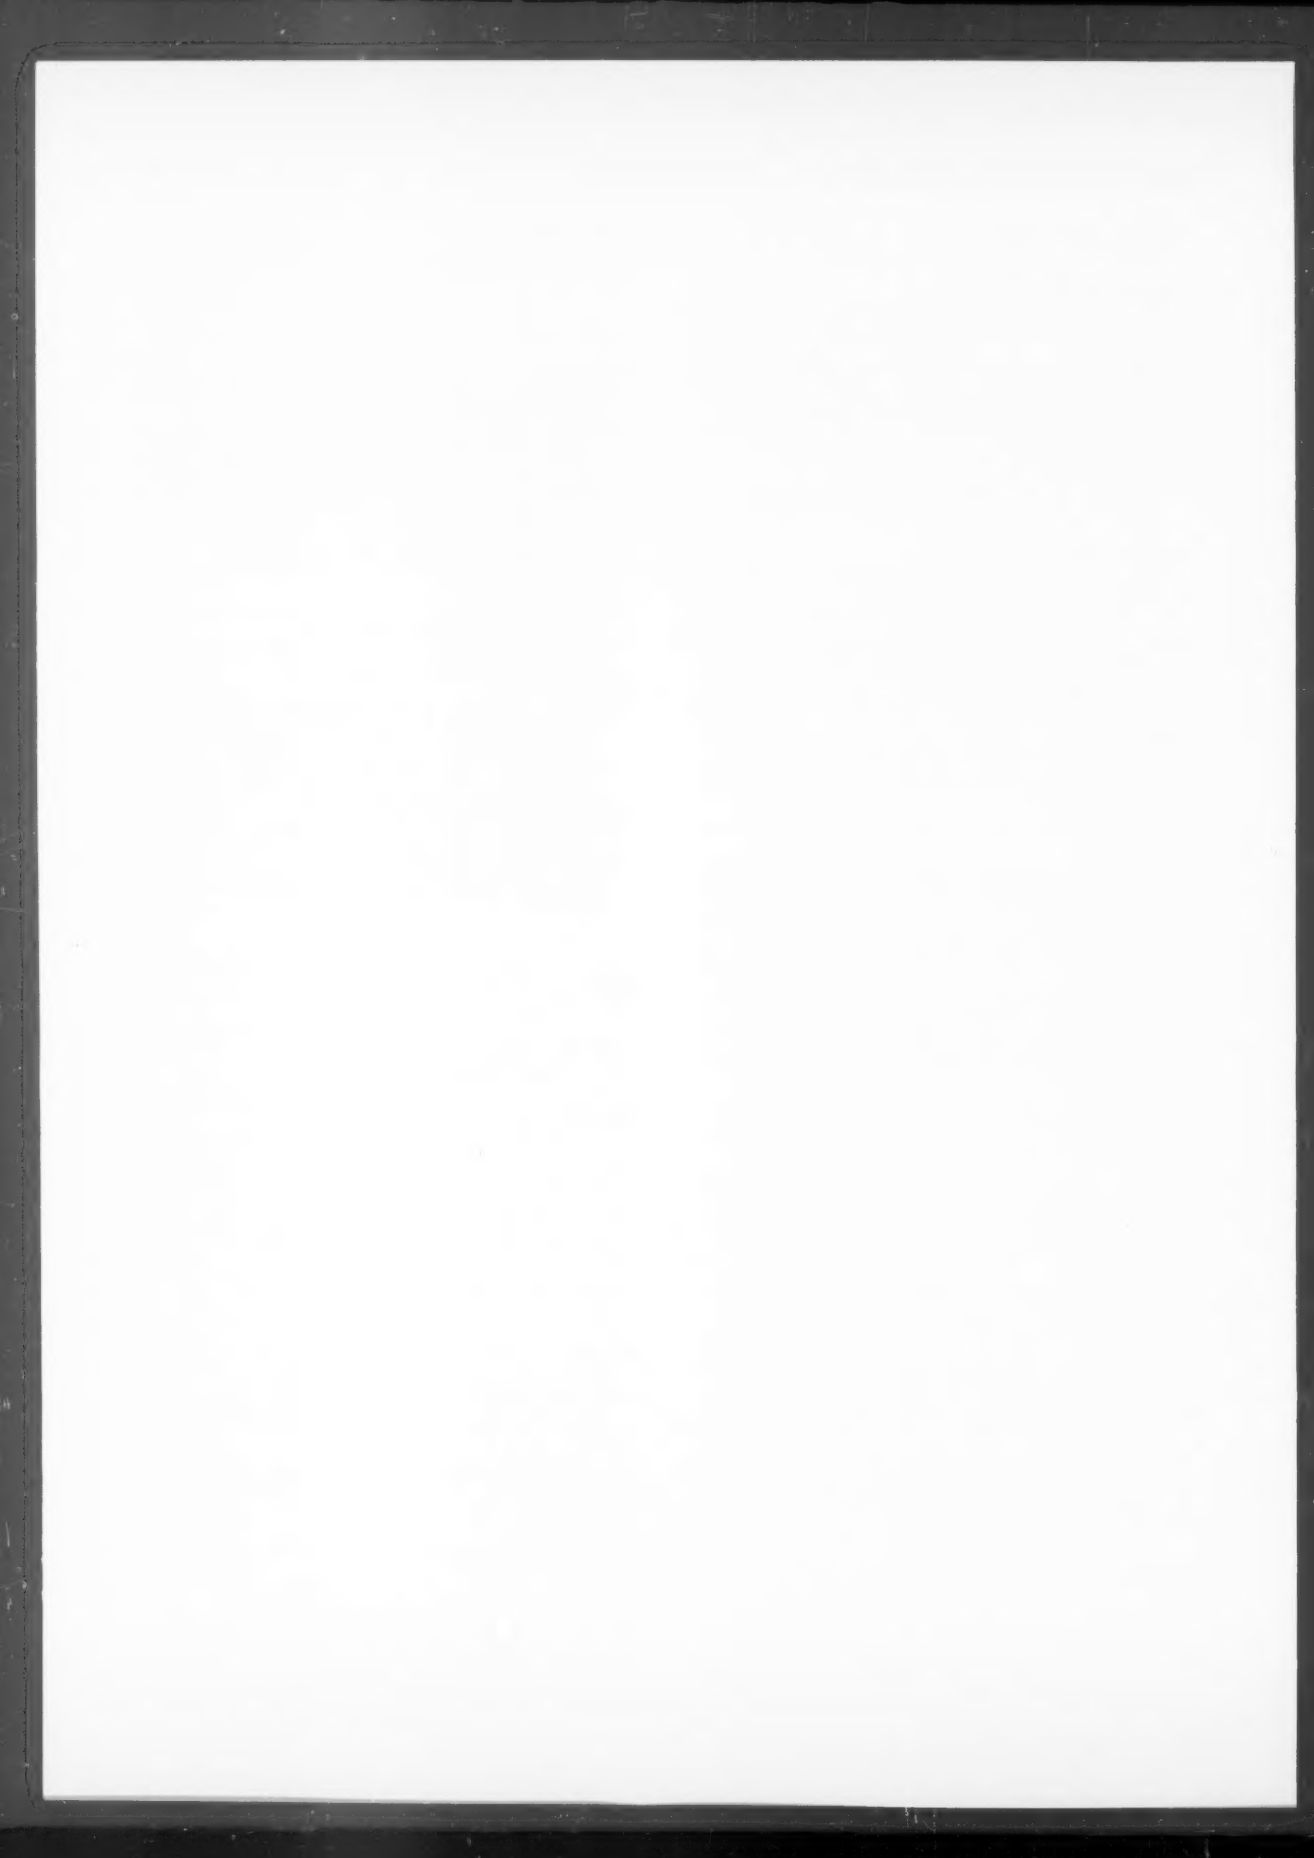

Effects of nitroglycerin on echocardiographic measurements of left ventricular wall thickness and regional myocardial performance during acute coronary ischemia, 926

A mathematical model of the dynamic geometry of the intact left ventricle and its application to clinical data, 1024

Wolff-Parkinson-White syndrome

A computerized method for the rapid display of ventricular activation during the intraoperative study of arrhythmias, 449

Electrophysiologic assessment of the atrioventricular conduction system after surgical correction of ventricular preexcitation, 789

 AHA President's Page
 Presidential Address AHA 51st
 Scientific Sessions
 W. Gerald Austen, M.D.

No. 4 (April)

Current Topic:

- The Mechanism of Closure of the Mitral Valve:
A Continuing Controversy** 615
Robert C. Little

Original Articles:

- Prevalence of Mitral Valve Prolapse in Presumably Healthy Young Men** 619
John R. Darsee, J. Ronald Mikolich, Nicola B. Nicoloff, and Laurence E. Lesser
- Echocardiographic Assessment of Cardiac Anatomy and Function in Hypertensive Subjects** 623
Daniel D. Savage, Jan I. M. Drayer, Walter L. Henry, Emmett C. Mathews, Jr., James H. Ware, Julius M. Gardin, Estelle R. Cohen, Stephen E. Epstein, and John H. Laragh
- Carotid Baroreflex Function in Young Men with Borderline Blood Pressure Elevation** 632
Dwain L. Eckberg
- Comparative Assessment of Stimuli That Release Neuronal and Adrenomedullary Catecholamines in Man** 637
David Robertson, Garland A. Johnson, Rose Marie Robertson, Alan S. Nies, David G. Shand, and John A. Oates
- Effects of Volume Expansion and Contraction in Normotensive Whites, Blacks, and Subjects of Different Ages** 643
Friedrich C. Luft, Clarence E. Grim, Naomi Fineberg, and Myron C. Weinberger
- Cardiovascular Response to Isometric Exercise in Normal Adolescents** 651
W. Pennock Laird, David D. Fixler, and F. Doug Huffines
- Evidence of Frank-Starling Effect in Man During Severe Semisupine Exercise** 655
James L. Weiss, Myron L. Weisfeldt, Steven J. Mason, John B. Garrison, Sue V. Livengood, and Nicholas J. Fortuin
- Effects of Open Heart Surgery on End-Diastolic Pressure-Diameter Relations of the Human Left Ventricle** 662
Henry M. Spotnitz, David Bregman, Frederick O. Bowman, Jr., Richard N. Edie, Keith Reemtsma, Donald L. King, Brian F. Hoffman, and James R. Malm
- The Characteristic Sequence for the Onset of Contraction in the Normal Human Left Ventricle** 671
Paul D. Clayton, Walter F. Bulawa, Steven C. Klausner, Paul M. Urie, Hiram W. Marshall, and Homer R. Warner
- Determinants of Ventricular Function in Pressure-Overload Hypertrophy in Man** 679
Stephen Gunther and William Grossman
- Quantitative Analysis of Cardiac Muscle Cell Disorganization in the Ventricular Septum in Patients with Hypertrophic Cardiomyopathy** 689
Barry J. Maron and William C. Roberts
- Transient Defects of Resting Thallium Scans in Patients with Coronary Artery Disease** 707
Henry Gewirtz, George A. Beller, H. William Strauss, Robert E. Dinsmore, Leonard M. Zir, Kenneth A. McKusick, and Gerald M. Pohost
- Thallium-201 Myocardial Scintigraphy in Patients with Triple-Vessel Disease and Ischemic Exercise Stress Tests** 714
Jeffrey Leppo, Tada Yipintsoi, Ronald Blankstein, Robert Bontemps, Leonard M. Freeman, Lenore Zohman, and James Scheuer
- Clinical Implications of the Technetium-99m Stannous Pyrophosphate Myocardial Scintigraphic "Doughnut" Pattern in Patients with Acute Myocardial Infarcts** 721
Robert E. Rude, Robert W. Parkey, Frederick J. Bonte, Samuel E. Lewis, Donald Twieg, L. Maximilian Buja, and James T. Willerson
- Lysosomal and Cytosolic Enzyme Release in Acute Myocardial Infarction: Effects of Methylprednisolone** 730
Elizabeth Welman, A. P. Selwyn, and K. M. Fox
- Effect of Indomethacin on Collateral Blood Flow and Infarct Size in the Conscious Dog** 734
Bodh I. Jugdutt, Grover M. Hutchins, Bernadine H. Bulkley, Bertram Pitt, and Lewis C. Becker
- Aspirin-Induced Increase in Collateral Flow After Acute Coronary Occlusion in Dogs** 744
Norine L. Capurro, Kendall C. Marr, Roger Aamodi, Robert E. Goldstein, and Stephen E. Epstein
- Aberrant Coronary Artery Origin from the Aorta. Report of 18 Patients, Review of Literature and Delineation of Natural History and Management** 748
Richard R. Liberthson, Robert E. Dinsmore, and John T. Fallon
- Identification and Localization of Aneurysms of the Ascending Aorta by Cross-sectional Echocardiography** 755
Anthony N. DeMaria, William Bommer, Alexander Neumann, Lynn Weinert, Hugo Bogren, and Dean T. Mason
- Ventricular Premature Contractions: A Randomized Non-drug Intervention Trial in Normal Men** 762
G. DeBacker, D. Jacobs, R. Prineas, R. Crow, J. Vilandre, H. Kennedy, and H. Blackburn
- Preeminence of the Left Stellate Ganglion in the Long Q-T Syndrome** 769
Richard Crampton
- Effects of Atropine on Induction and Maintenance of Atrioventricular Nodal Reentrant Tachycardia** 779
Delon Wu, Pablo Denes, Robert Bauernfeind, Ramesh C. Dhinra, Christopher Wyndham, and Kenneth M. Rosen

SUBJECT INDEX

A

A wave

- The clinical value of the calibrated A wave and its relationship to the fourth heart sound, 1412
- The influence of left ventricular late diastolic filling on the A wave of the left ventricular pressure trace, 510

Acetylstrophanthidin

- Diminished inotropic response but unaltered toxicity to acetylstrophanthidin in the senescent beagle, 1548

Alpha-receptors

- Response of the systemic and pulmonary circulation to alpha- and beta-receptor blockade (labetalol) at rest and during exercise in hypertensive patients, 1214

American Heart Association Established Investigators Program

- No growth in the training of clinical cardiovascular investigators: data from the Established Investigator Program of the American Heart Association. Letter and response, 213

Amiodarone

- Amiodarone. Letter and response, 1426

Angina pectoris

- Arrhythmias in variant angina pectoris. Relationship of arrhythmias to ST-segment elevation and R-wave changes, 1343
- Effect of medical vs surgical treatment on symptoms in stable angina pectoris. The Veterans Administration Cooperative Study of surgery for coronary arterial occlusive disease, 888
- The prognostic value of systolic time intervals in angina pectoris patients, 268
- Redistribution of thallium at rest in patients with stable and unstable angina and the effect of coronary artery bypass surgery, 1114
- Reproducibility of clinical and hemodynamic parameters during pacing stress testing in patients with angina pectoris, 1036

Angina, unstable

- Key references: Unstable angina, 1650
- Quantitative coronary angiography: measurement of the "critical" stenosis in patients with unstable angina and single-vessel disease without collaterals, 106
- Redistribution of thallium at rest in patients with stable and unstable angina and the effect of coronary artery bypass surgery, 1114

Angina, variant

- Ergonovine and variant angina. Letter and response, 217
- Multivessel coronary artery spasm, 451
- Provocative testing with ergonovine to evaluate the efficacy of treatment with calcium antagonists in variant angina, 504

Angiography

- Angiographic study of univentricular heart of right ventricular type, 1325
- Characteristics of ventricular function in single ventricle, 849
- Comparative sensitivity of the exercise electrocardiogram, thallium imaging and stress radionuclide angiography to detect the presence and severity of coronary heart disease, 1270
- The effect of acute regional myocardial ischemia on the angiographic anatomy of coronary arteries, 1335
- Exercise and human collateralization: an angiographic and scintigraphic assessment, 114
- Left ventricular volumes by gated equilibrium radionuclide angiography: a new method, 556
- Long-term serial angiographic studies after coronary artery bypass surgery, 250
- Myocardial kinetics of thallium and potassium in man, 776
- Quantitative coronary angiography: measurement of the "critical" stenosis in patients with unstable angina and single-vessel disease without collaterals, 106
- Regional left ventricular function assessed by contrast angiography in acute myocardial infarction, 130

- Response of left ventricular volume to exercise in man assessed by radionuclide equilibrium angiography, 565

- Sensitivity, specificity and predictive accuracy of radionuclide cineangiography during exercise in patients with coronary artery disease. Comparison with exercise electrocardiography, 572

Angioplasty

- Editorial: Percutaneous transluminal coronary angioplasty, 969

Angiotensin

- Dynamic aspects of acute mitral regurgitation: effects of ventricular volume, pressure and contractility on the effective regurgitant orifice area, 170

Anoxia

- Visualization of the distance between perfusion and anoxia along an ischemic border, 1151

Antibodies

- Occurrence of circulating heart-reactive antibodies in a population of cardiac transplant recipients. Correlation with cardiac rejection and subsequent course, 629
- Specificity of localization of myosin-specific antibody fragments in experimental myocardial infarction. Histologic, histochemical, autoradiographic and scintigraphic studies, 1527

Aorta

- An evaluation of the left atrial/aortic root ratio in children with ventricular septal defect, 364
- Research related to surgical treatment of aortic and peripheral vascular disease, 1619

Aortic coarctation

- Morphologic development of the pulmonary vascular bed in experimental coarctation of the aorta, 349
